

Sales Analysis

6/7/2025

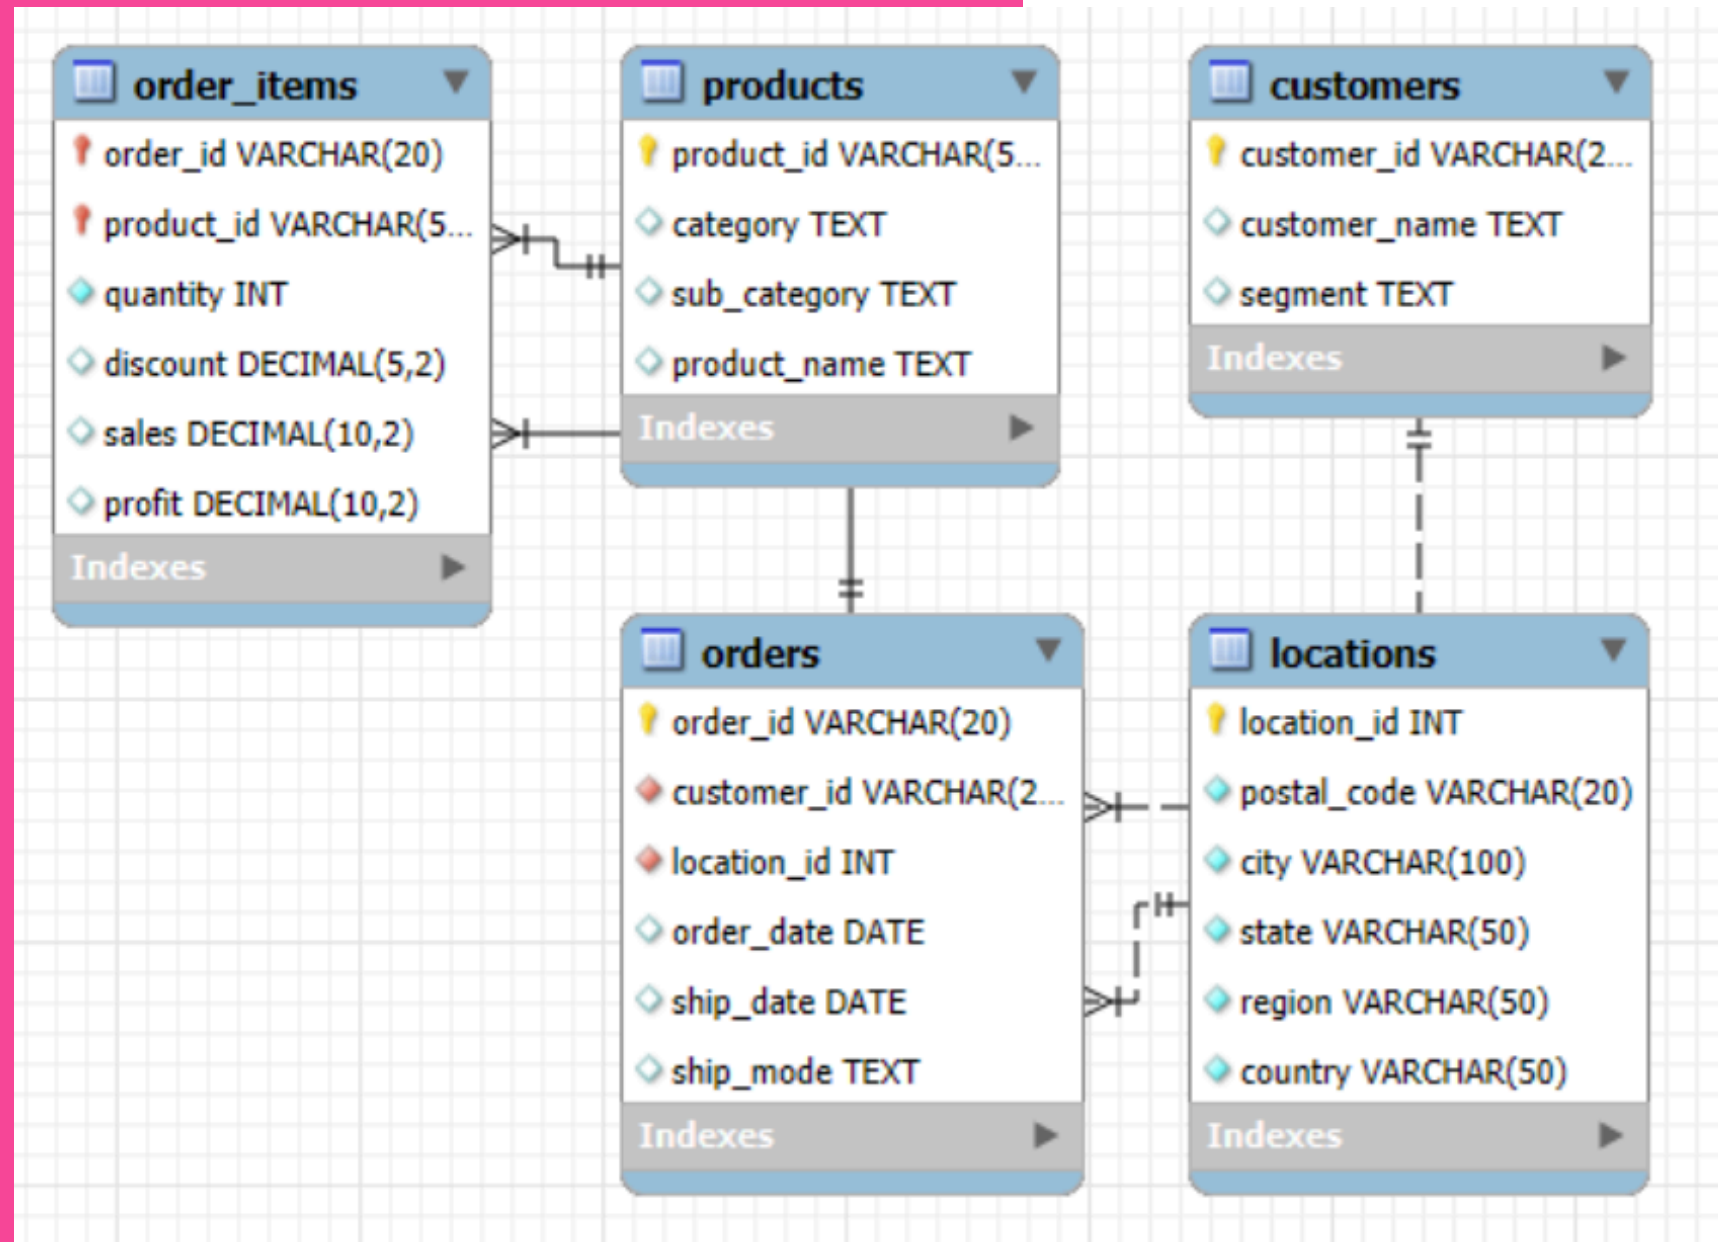

Presented by
Tanishq Tiwari

Dataset used:
mini_project_store.csv

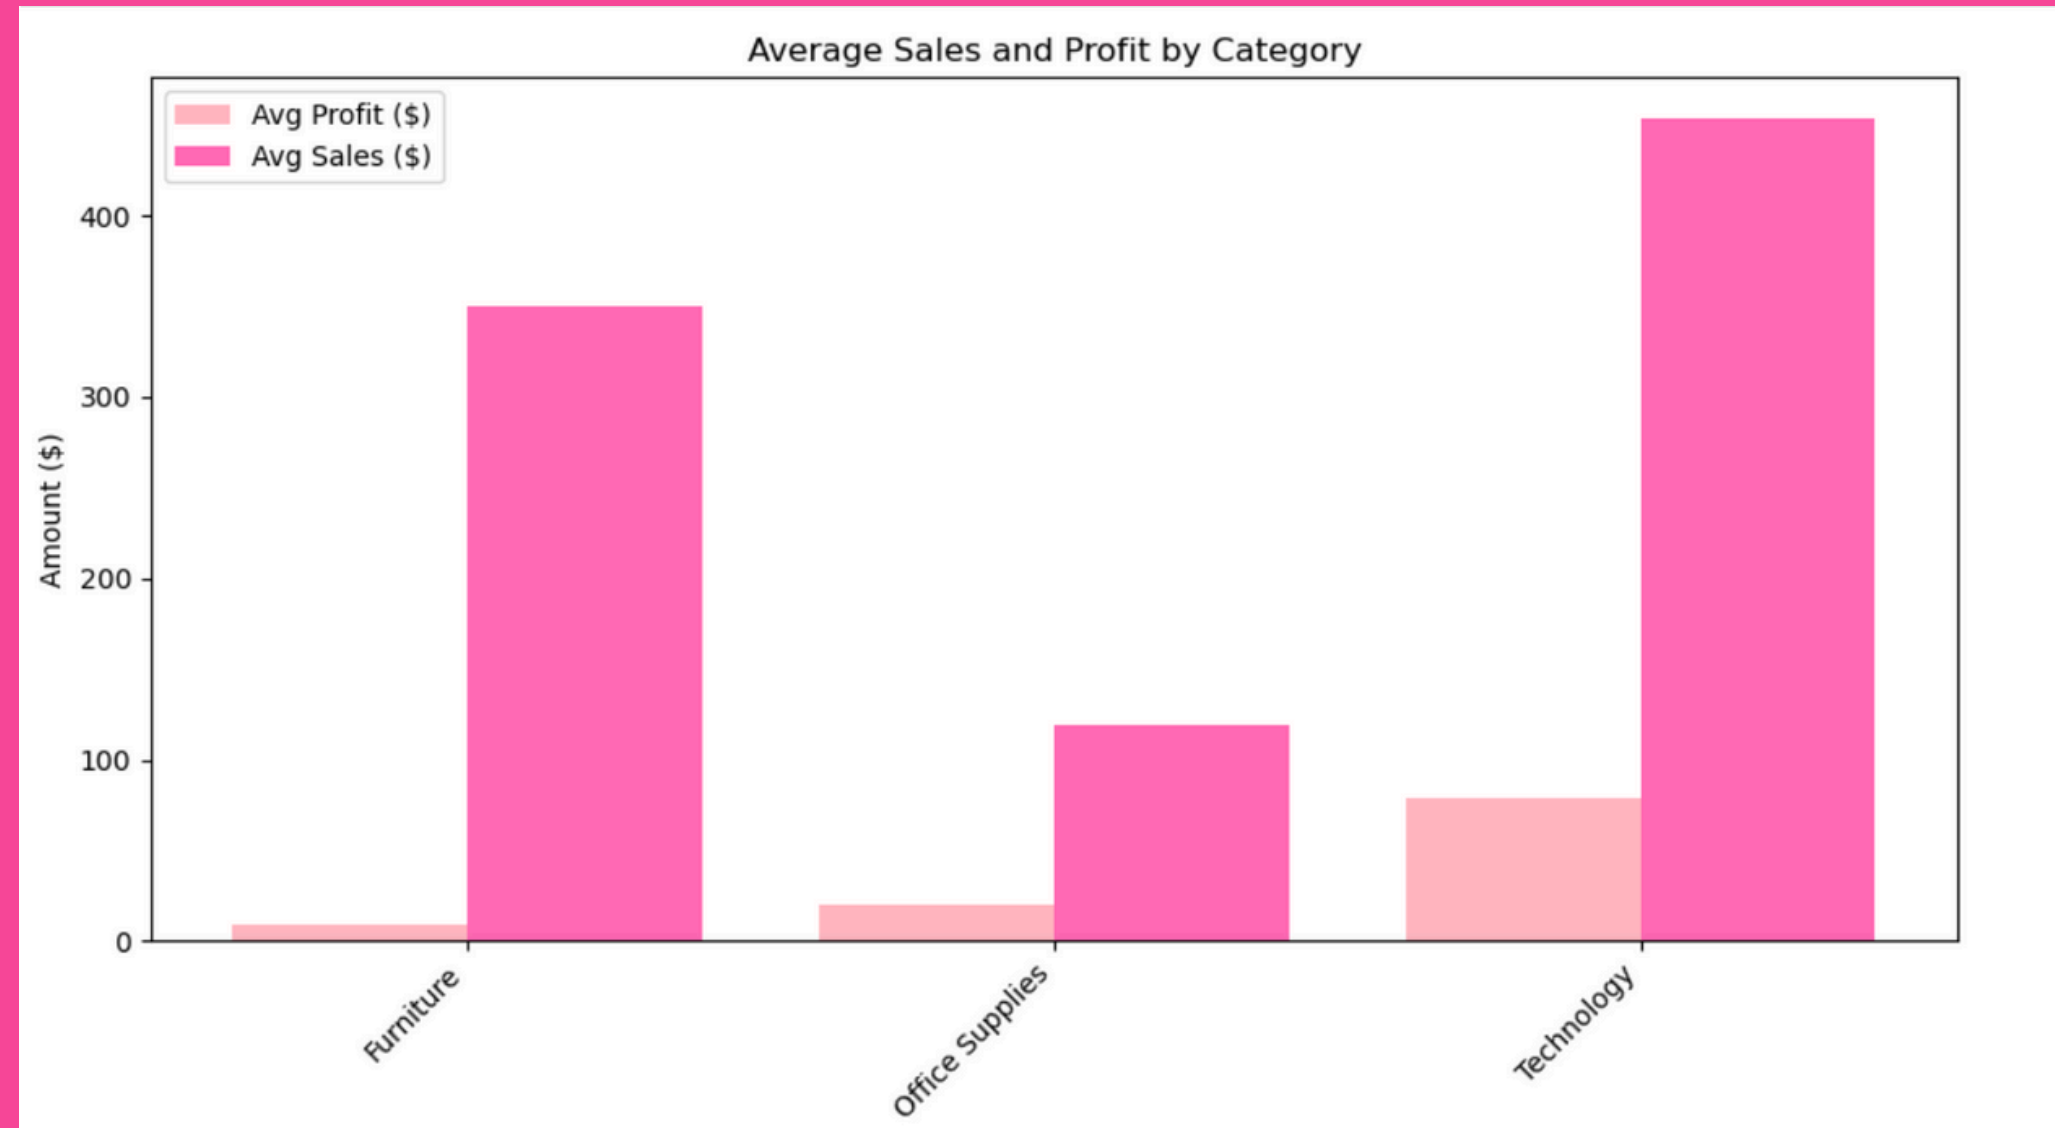

Schema Entity Relationship (ER) diagram

Avg Sales vs. Avg Profits

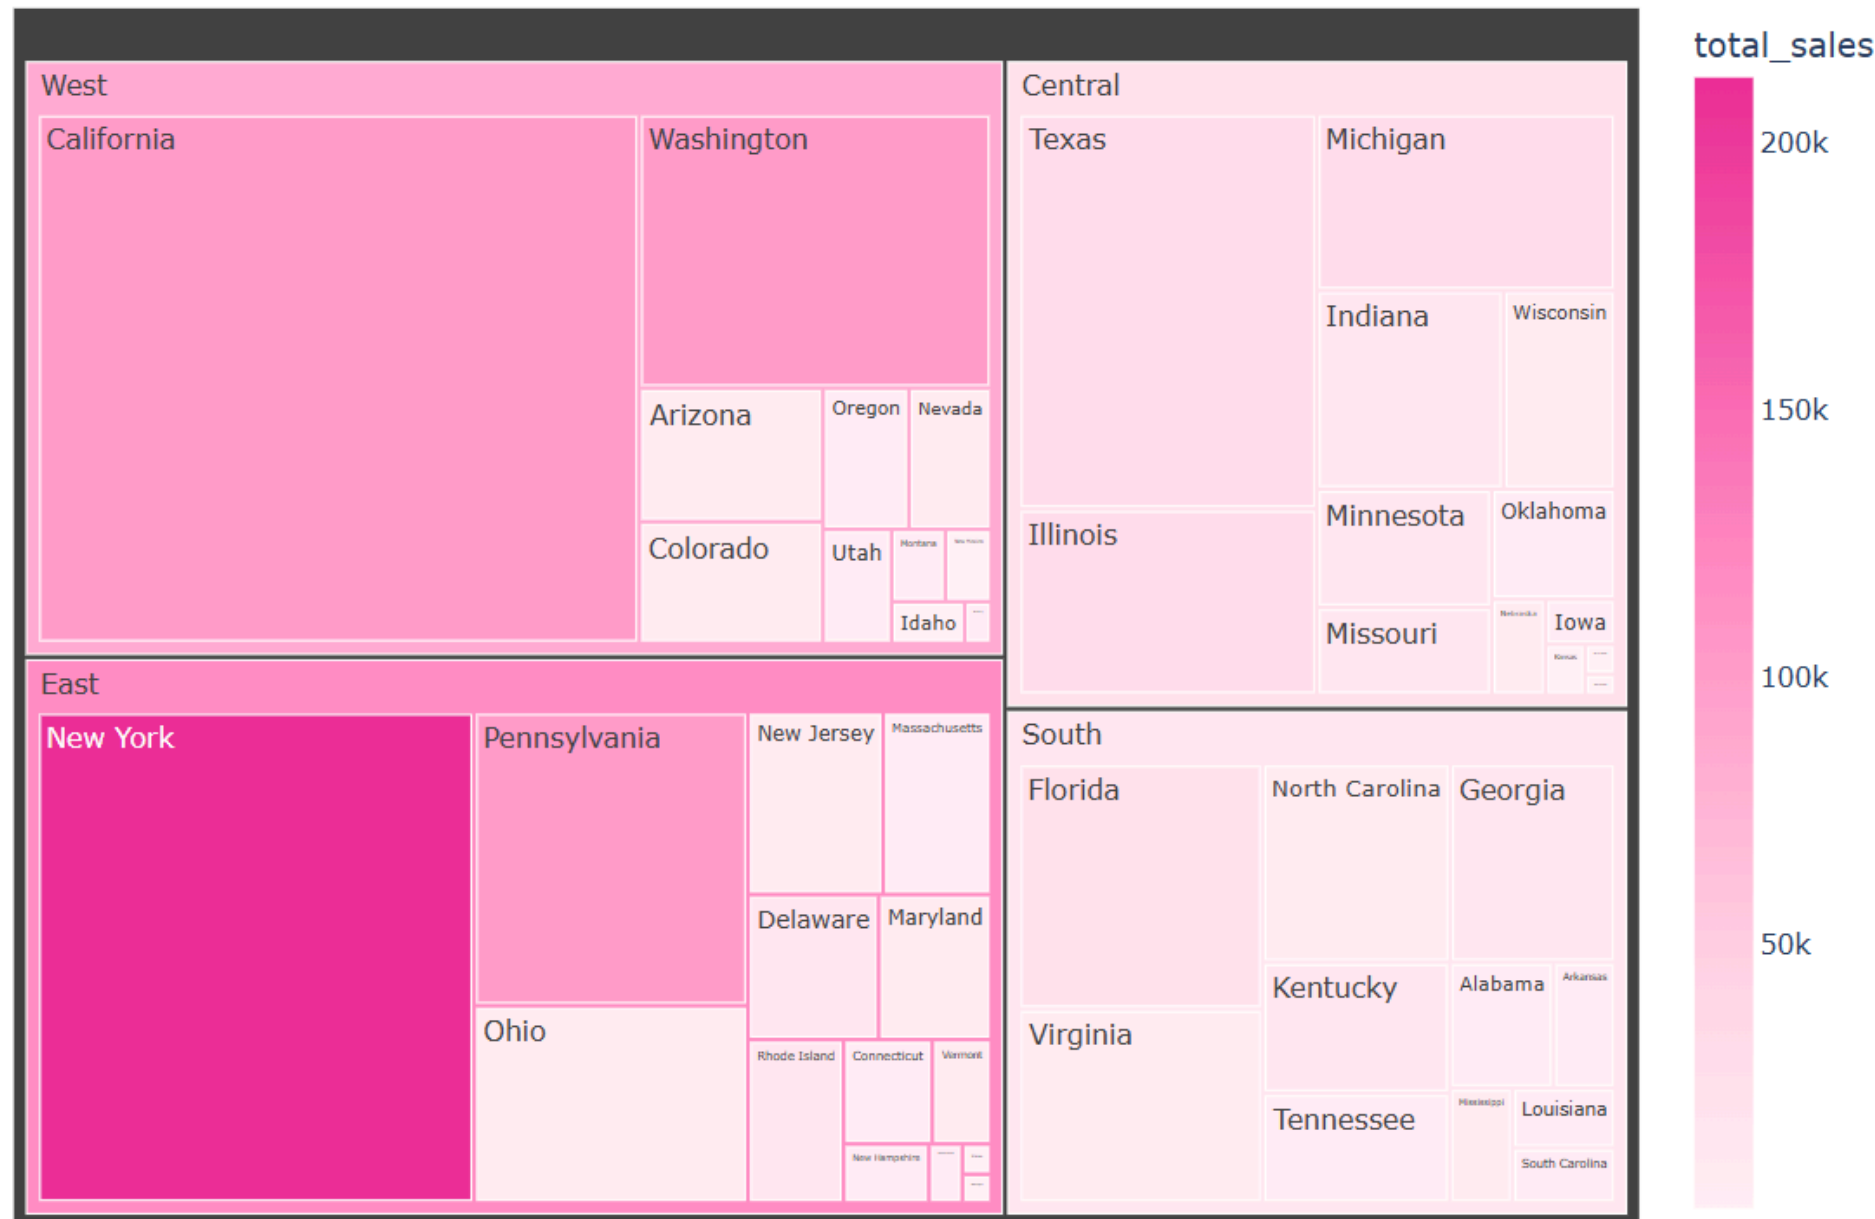

This is a fairly simply visualization but a crucial first step to any analysis. We see that profits for furniture is much lower than that of Tech products

Regional Sales

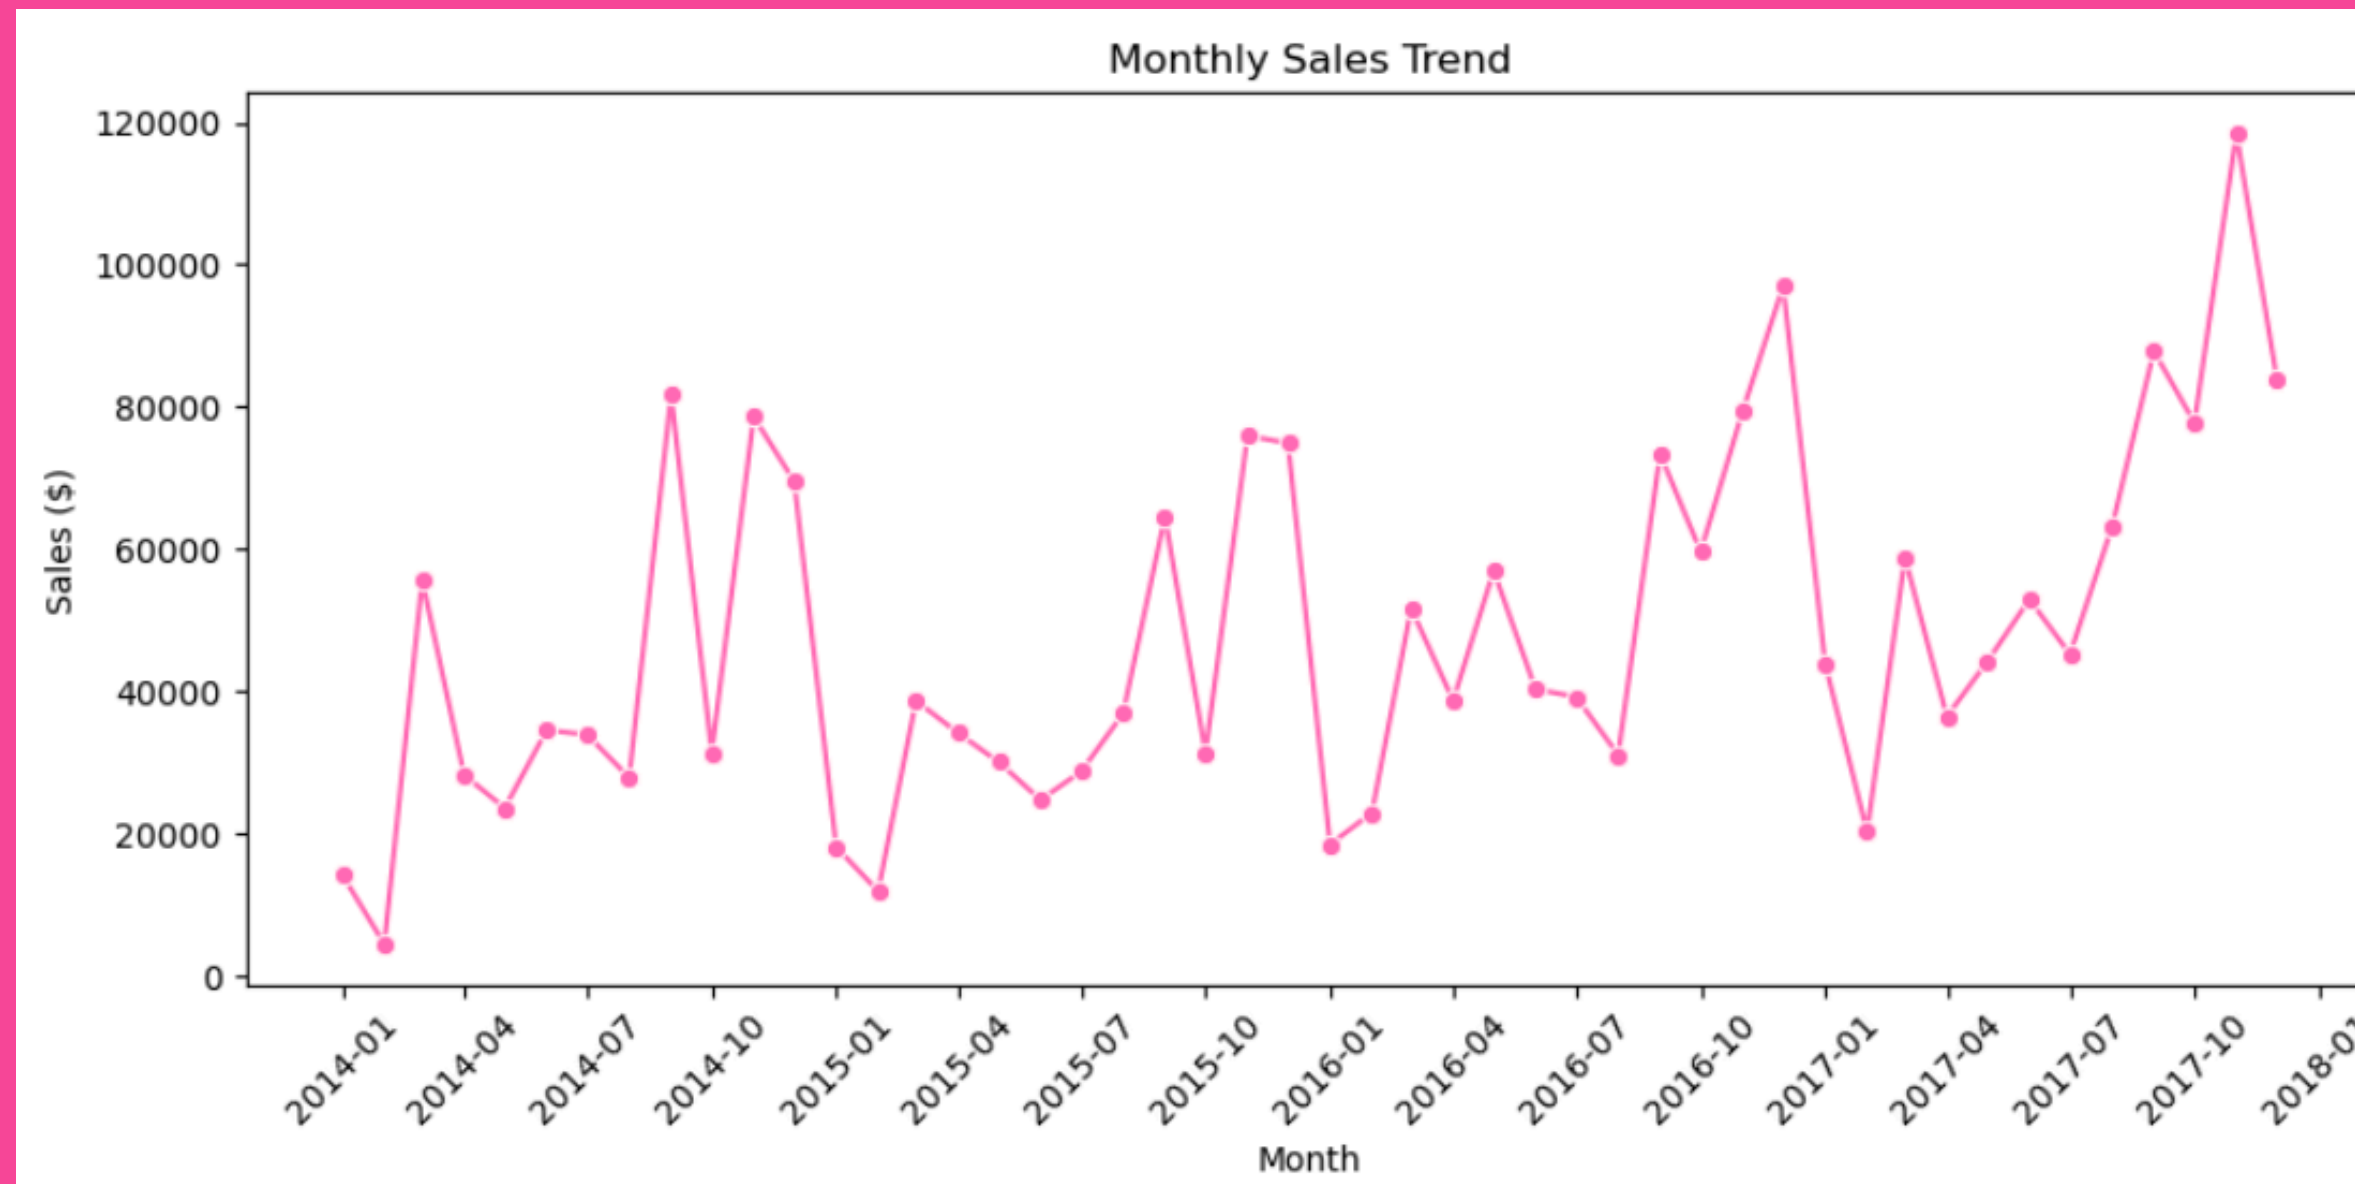

Allows us a snapshot of sales division by region. Helps understand the best performing sales region and what regions need work. A breakdown into smaller location groups provide detailed insight. A larger portion of the sales can be attributed to the east cost especially New York.

Total Sales by Region and State

Monthly Sales Trend

Monthly trends over 4 years will help us identify seasonality in our sales, here there are spikes towards the end of the year and troughs in the start

Discounts and Sales

Only noticed a slight tilt in the regression line. A great first step into further study of nudges for the customer.
